technology
work

Delivering the practical skills and experience you need

Every organisation today needs to focus on
getting the most from its computer and
communications systems. It's vital to equip for
the future with the latest web and intranet
solutions. Aegis can give you the competitive
edge, with well designed and planned solutions,
all the way through to implementation and
handover.

Aegis starts from a strong hands-on technology
base. At the same time we have the broad
business experience required to make technology
work hard for your company.

Aegis services embrace every stage of the
business solution lifecycle - from consultancy via
implementation to maintenance and support,
locally, nationally and internationally. Aegis give
you access to hardware, software and services
tailored to your needs, providing full support
allowing maximum benefit from your IT
investment.

Networking

Aegis network design and management consultants are fully Cisco/Nokia/3Com qualified and have practical experience delivering every stage of network projects. As well as specific UNIX, Microsoft and Novell skills accreditations, Aegis offer world-class systems integration.

Strengths:

Cost effective high-performance LANs, WANs, intranets and extranets.

Advice and project management of Internet and e-commerce projects including

Selecting your Internet Service Provider and building your web presence.

Expert hardware installation including integrated cabling for CAT 5/6 and Fibre Optic.

Integration with voice communications and telecoms to provide a single structured environment.

Customised software and PCs

You can't always get the right solution off the shelf. Aegis offers you the scarce skills IT requires to build customised applications, installing and deploying them across your systems and networks. It is the cost-effective way to have an 'in-house' understanding of your business needs, without the overhead of a development team.

Development and programming skills offered include Assembler, Visual Basic, C++, MS Access, HTML and Java.

We have our own manufacturing capability, producing bespoke workstations and service solutions for the SME market through to the enterprise requirements.

Our in-house team of developers delivers a wide range of bespoke applications to organisations of all kinds - locally, nationally, and internationally.

For all your computing needs - call Aegis on +44 (0)1865 390000

The computing and networking partner for your business

Aegis is equipped to manage every stage of a PC or networking project: from initial analysis of your requirements, through to the physical installation of the system.

network operations

We understand every aspect of today's complex system and network operations, and we offer a full range of services to deliver key solutions including:

Document management

Document image processing

Colour image processing

Mail and communications systems

Internet and intranet system planning and implementation

As well as manufacturing custom PCs and developing bespoke software, we also supply products from leading IT vendors including, Hewlett-Packard, Compaq, Apple, Epson, Toshiba, 3Com, Novell, Seagate and Microsoft, providing fully accredited service and support:

Our helpdesk is available to help you resolve your I.T. problems. We can assess and diagnose problems prior to our engineer visits. All calls are all logged, monitored and escalated depending on the customers needs.

installation

Microsoft Solutions

We offer fully accredited consultancy, installation, training and support across the complete Microsoft range of products.

Operating system optimisation

Aegis will ensure that your PC and network operating systems are configured to perform optimally in every respect, fine-tuning Windows 98/2000/NT to support your business objectives.

training

Ensuring applications efficiency

Most organisations only use a fraction of Microsoft Office's capabilities. At Aegis we can customise your installation, speed up your system, and reduce your costs - ensuring you get the best return on your investment in world-class applications.
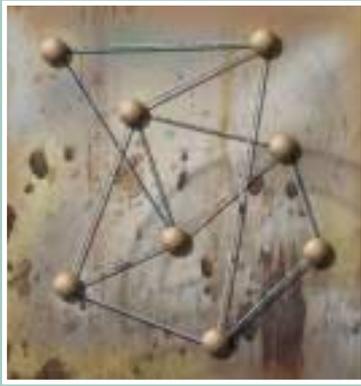

E-mail and messaging for the new millennium

Microsoft offers a wide range of tools and applications to ensure you communicate effectively inside and outside your organisation. Aegis has an installed base of over 40,000 Microsoft Exchange users, ensuring the best email solution.

email

Delivering Database advantages

Using business information effectively is vital. Microsoft Access and SQL databases offer businesses scalable solutions for every kind of requirement. Aegis can help you design and develop the knowledge management resources you need.

Network Infrastructure

It's one of the most critical changes for your business. How effectively you design, plan and install network resources will dictate how successful you will be in the future.

Networks increasingly underpin internal communications and teamwork. They facilitate efficient supply chain management and through web based channels they offer dynamic sales opportunities, giving access to customers anywhere in the world 365 days a year, 24 hours a day, 7 days a week.

Web development:

Whether you are looking for a full ecommerce solution, Company Intranet, a small site of 5 pages, a professional network of sites with CGI scripts and advanced custom programming, Aegis Computers are the web site design company for you.

We don't just offer simple web-sites-in-a-box. Aegis spend time with you working you through the whole process making sure the site maximises your full potential.
